NEW NOVEL BY HALL CAINE.

SECURED FOR PUBLICATION IN THE HONGKONG DAILY PRESS. "THE MAHDI."

A STORY OF LOVE AND HEBOKEM. T. HALL CAINE, "The Scapegost," "The Bondman," The Deemster," " Shadow of a Crime,"

" A Son of Hagar," "The Manxman," WILL COMMENCE IN OUR COLUMNS .

BATURDAY, 30th MARCH, 1895.

Mr. HALL CAINE, who is, without doubt, the ablest and most graphic Novelist of the age, has very closely studied the condition of the oppressed peoples of Europe and Northern Africa, and has introduced into his books scenes of intense power taken from actual events. In his latest work, "The Mahdi," Mr. HALL CAINE endeavours to bring home to the bearts of his r aders something about that strange. personage, the Mahdi, which has not previously been published. The Mahdi, in Mr. Caine's judgment, was a hero and a patriot; a min possessing the wisdom almost of a Solomon with the military powers of a Saladin. In battle he 20] knew no fear, and before howling and derisive mobs he preserved a calm and dignified bearing. He struggled to free his countrymen from the tyrante who held power, and he nought to give woman, her rightful place as man's equal and

help meet. · · -Such a personage might well form the subject of a book, and in "The Mahdi" Mr. HALL CAINE has utilised the chief facts of history and woven into them a love story of universal interest and tenderness.

COMPLICATIONS.

When we predicted that a crisis would come with the despatch of Li Chang-t'ang as Ambassador of peace to Japan we were not prophenying without facts to guide us. The last few days have, in funt, seriously altered ne centre-of gravity of the negotiations. It is now a long period to hark back to October last when a Cabinet Council was hurriedly held in London, the result of which, as we are unfortunately aware, proved a miserable fiasco. That Council, however, decided, one thing, and that was that whatever happened in the Far East, Great Britain would not be again in the position of taking a leading part. There is now, very little doubt that opportunity was taken of the presence of H.E. Li in Peking to open regotiations with Russia and France. What those negotiations have led to has not yet become apparent, but there is reason to believe that, as Russia in 1860 took advantage of the war between Great Britain and China to obtain possession of the seaboard of Eastern Manchuria, she bas now, on the promise of checkmating the Japanese compation of the province of Shingking, including the old capital of Monkden, obtained a promise of a still further acquisition of Manchurian territory. On the other hand. Russia has not been alle in Japan, and the Japanese Government has cases silks. I cases ginger, 12 cases blackwoodbean urging on it, as an offset to its gaining ware, 100 boxes staraniseed, I case feathers, I Rates. possession of Western Manchuria, that Japan case carthenware, 40 rolls matting, and 5 cases would agree to Russia's occupation of the two human hair. France has been a party to those negotiations, We make no comments, -- Mercury. 20th March |- For San Francisco-200 bales

TEA CULTIVATION IN MAURITIUS!

According to the Mauritius Plosters' Gasette we are to have another rival tea-growing country competing with China, Japan, India, and Ceylou for the markets of the world as the planters of packages vermicelli, 910 bags beans, 849 boxes Magritius intend to athlise land amountable for augar oultivation for tea growing: "Way Times of Cepton have no doubt that ten will grow well in manritius, but the question of labour has to be considered, and with their indentured and rather expensive coolie supply. We fancy the Mauritius planters will find it difficult to compete with the cheaply-grown tess of Chuca, India, and Caylon. There is no allusion to this difficulty, however, in the following extract, which is very sanguine in its tone :-A cablegram, received this morning, announces

that at a meeting of the Assats Company, the Chairman said that experts had declared that the Mauritius tea recently imported into England Th. was of the highest quality, and that the cultiva-tion of this plant would possibly be the salvation of Manritius. This news has onused great satisfaction here, for, although we knew, already, that our colonial tea was of a superior quality; yet it is nevertheless agreeable to hear the fact proclaimed publicly by experts in London. The height of mean soa-level has been determined, from the tidal observations of 1887 and 1884; in 5.87 feet above zero of the tida-gauge at the Kowleon Tidal (theoretatory; and the Low-water Ordinary Spring-Tides, to which data a the heights in these Tables are referred, in 3.87 feet allows zero.

The heights in the Tables marked with a minus sign (-) are below Low-water Ordinary Spring-Tides, and should be subtracted from the constant given above. This appreciation by competent persons will have the effect of giving a fresh imperus to the cultivation of tea in Mauritius. The consumption of tea is daily making rapid progress not only in England, but on the Continent as well; in America it is also increasing, and the produce of Ceylon and China barely suffices (!) Under these circumstances, colonial ten will always find good markets. If it is considered imperior to what is produced elsewhere, it will be preferred to the CHINA COAST METEOMOLOGICAL BEGINSTER, latter and prices will go up us the demand for it increases. We therefore strongly urge upon our compatricts to undertake the cultivation of tes on a large scale. Aiready owing to the impulse given by several intelligent planters, such as M. A. Darnthy de Grandpré and Mr. Hay, the Manager of the "Mauritius Assets and Estates Company, Limited," this oultivation has been extended. M. Daruthy's plantations Nagasaki at "Nouvelle France," and those of Mr. Hay at Chamare, are very fine ones, and cover several hundreds of acres of land, but there are still uncultivated lands which might in the space of a few years, be converted into luxuriant plantations

This plant requires hardly any cure. Once it has been planted, it only needs to be watched now and then; and that is all. 'It resists cyclones which are so frequent in these latitudes; and the Haiphone Indian women who are generally employed in our agricultural, fields get acquainted, in the space of a few months, with the cultivation of the plant and the gathering of the leaves. Władwostuck ... Mr. Coreon, at the head of the Experimental Plantation Farm, soon initiated the first planters | Nagasaki

in the knowledge of preparing tes; and this proare not suitable for the sugar cane should there! fore be planted with tea. This industry, it must be remembered; replaced that of coffee when disease attacked the coffee trees in Ceylon. The sugar industry is now passing through a oritical stage owing to the fall in prices and to the T. f. chosphaeria eacchuri which did great harm last year. It is absolutely necessary that we should at ches forses events and develop a secondary. industry, which would be likely to replace our staple industry, in case the latter should fail us. We may add that all the tea which may be produced here will at once flud a ready market,
